

Hose Nipples, Pin Lug and Water Couplings

We provide hose combination nipples and menders for water and gardening use, connected with thread, welding butt and pin-lug types on the other end. They are produced in carbon steel, usually with or without plating process, stainless steel 304 & 316, aluminum and brass alloyed materials.

KC and menders are available in the range of $\frac{1}{8}$ " ~ 12", pin-lug couplings $\frac{3}{4}$ " ~ 6" and light-duty brass fittings or water couplings $\frac{3}{8}$ " ~ 2".

The shanks are made according to general standards or tailored dimensions per specific hose requirements.
